

**Sherwins Area Recreation Plan (SHARP)
Project #16**

CONCEPT: Soft-surface non-motorized connector from the Mill City staging area to the trail connecting it to the western end of the meadow (see Summer Map ID #5a) and Mammoth Rock Trail, with additional connectivity to La Verne Street.

Develop a soft-surface non-motorized connector trail that will link into Mammoth Rock Trail and the meadow via the trail connection described in Summer Map ID #5a. This spur, which will be ADA-accessible, should be aligned with the identified existing use-trails/roads if possible and will include an ADA-accessible constructed overlook/scenic vista area. ADA access may terminate at the vista point. A spur to La Verne Street should be developed as well.

Trail Alignment Study DRAFT 06/12/2018
