

Hi there...

Thanks for volunteering your time and energy with MLTPA! The Town of Mammoth Lakes has contracted Mammoth Lakes Trails and Public Access (MLTPA)—a local citizens’ group dedicated to identifying and preserving trails, activity areas, and backcountry access—to generate an inventory of outdoor recreation amenities within the Town Urban Limit, Town Boundary, and the surrounding public lands. This information will be used by the Town to ensure that current and future planning takes into account the vast array of outdoor recreation amenities that surround our community and are integral to our culture and our economy. As a volunteer, you will be collecting information about all the summer and/or winter activities people enjoy from specific points of access; in other words, helping us determine how people get to the places they like to play.

Your contribution is important and much appreciated. If you have any questions during the course of filling out this sheet, please do not hesitate to call me with questions.

Best,
Kim Stravers, Project Director, MLTPA
